

# How Not to Get Hacked – Cyber Security

## Synopsis

Cyber Security was identified as one of the largest risks in Local Government, and this program is suited to all council officers at all levels.

You will be surprised at how many cyber threats surround each one of us, and yet how easy they are to spot when you know what to look for, and how easy they are to deal with when you are armed with the knowledge this course provides.

- An introduction to criminal hacking and its impacts
- File extensions
- Removeable Media
- URLs (Links)
- Email safety
- Information procedures
- Deep fakes
- Website safety
- Social engineering
- Phishing
- Social media
- Physical IT security
- Authentication (logging in)
- Helping IT

## Learning Outcomes

Improve your organisation’s cyber security skills and knowledge and reduce the risk of cyber attacks and phishing.

## Course Details

- Delivery: Virtual
- Structure: Interactive Workshop
- Time: 90 minutes
- Class Size: Max 20
- Cost: On request

## The Trainer

With over 25 years of experience in the IT sector, working in the UK, NZ, and Australia, Mike identified that most IT security issues were caused through a lack of knowledge and education.

This realisation led Mike to establish an IT/Cyber Security Awareness program which he delivers throughout Australia. His passion is to ensure that people are trained in how to identify IT security threats and respond appropriately to avoid damage to the business.

Because of Mike’s extensive knowledge, he ensures his workshops are engaging and educational so people can build confidence in working with technology every day.
